

## INTRODUCTION

Recently graduated as a Computer Science Engineer and passionate about managing and data technologies, I seek various international opportunities in my field. Since 2016, I have been working at Orange and with my academic professors with extra-school projects around data. My passion about new technologies and my past experiences in Digital Transformation convinced me to pursue my path as a Engineer. Today I wish to capitalize all of these experience and keep developing my skills and grow in a dynamic international environment.

## PROFESSIONAL EXPERIENCE

**Data Analyst - Orange France | Arcueil – France** **2017-2020**

**Optimisation of unit price of fiber network**

IBM COGNOS | POWER BI | RDBMS | Project management | Financial modeling

### Duties :

Produced different analysis and visualization tools. Their purposes were data queries automatization, customization of queries, and quality data control. Always Data driven projects in a user-friendly environment. The goal was to optimize the unit cost and human cost of fiber development in France.

- Analyzed processes, data conception, and RDBMS / SQL queries development
- Improved the quality, veracity and velocity of large data processing (MPP)
- Implemented data visualization tool exploiting different visualization libraries
- Monitored project, expertise and technology intelligence
- Calculated various cost estimate, financial modeling, scheme design

Non computer science:

- Refined Technical Process and conducted tool training

**Package Developer - Orange France | Paris – France** **2016-2017**

**Script developer , software integrator**

Scripts | Software Induction | Tests operator | Project Management

### Duties :

I designed and created software packages to be installed on Orange computer park. These packages invisibly installed software components without harming the owner's work.

- Developed scripts, drove tests and project induction and SQL queries
- Analyzed software performance and monitored technological developments

Management work (last 2 months) :

- Managed Software licenses: automatic detection of unused software and redistribution licenses by various SQL queries tools
- CHANGE – Member of Change Advisory Board - Project Owner management

## SKILLS

### Languages :

#### Data

SQL | Scala | MatLab | Data Modeling | Python

#### Programming

JAVA | C++ | C | GoLang | VBS/VBA | MIPS | Script/Bach

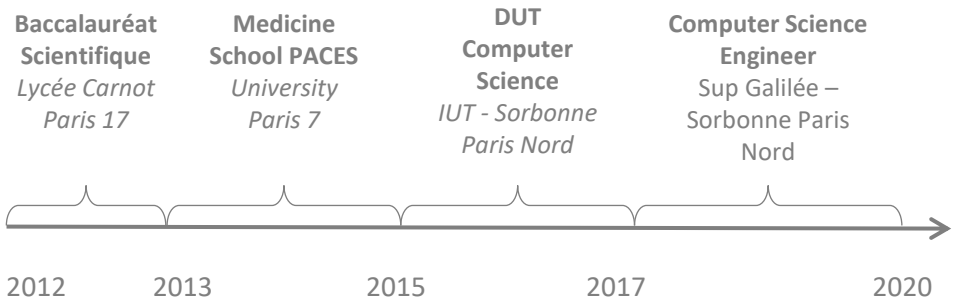

#### Web

XML | XSD/DTD | RDF/RDFS/SparQL | SVG | PHP | HTML/CSS/JS | Web Multilingual

#### Operating System

Windows | UNIX | Mac/OS

## EDUCATION

**Aminn Tamsouh 25y**  
*Computer Science Engineer*
